Figma, Sketch, HTML, CSS, Adobe (Photoshop, Illustrator, After Effects, Premiere Pro, InDesign)

Work

SuperIntro

UX Designer &
Frontend Engineer
Current

- **Created design and style guides** to ensure brand and visual consistency across the product.
- Implemented front-end features, collaborating closely with backend developers for seamless integration.
- Facilitated design critiques and integrated feedback loops to accelerate product iteration.

CALICO Films

Production Development Intern
2024

- **Edited more than 10+ features** in film, drama, and documentary categories.
- **Presented 20+ ideas** to the team that can be utilized for future projects and **researched 100+ sources** to obtain potential ideas.
- **Organized 30+ files and events** that were held for media products, created by the company

Project

Dream AI Hackathon

Product Designer
2025

- **Designed a smart routing system app that can be used by paramedics, and the team made it to the Finalist round**
- **Designed to assist emergency medical teams** in reducing response times through AI-driven insights and real-time hospital data
- **Analyzed 10+ news articles, videos, and university-level reports** to fully understand the problem and design for 2 different types of users (paramedics, patients)
- Built a design principle that prioritized goals, trust, and accessibility

Hack the Valley Hackathon

Product Designer
2025

- **Designed a cutting-edge global stock investment platform to redefine the way users engage with financial markets**
- Interviewed 5+ people in the Silicon Valley community, including tech specialists to venture capitalists
- Implemented APIs from X and OpenAI for further development in future

Education

University of California,
Irvine

BA in Film and Media Studies
Minor in Business Management
